B) Dark Walnut _____
C) New Concept colors _____

- 2) Type of ceiling in Restaurant and color

- A) Standard Drop ceiling _____
B) Open ceiling concept _____

Tile Color: Tan _____ Black _____ Other _____

- 3) Installation Location

We place the jukebox in the bar since it is played primarily by the guest sitting in the bar area. Since there are many variations of floor plans, it is advisable to have the GM and or area Director call me while on location. Please take pictures and text them to me so we can discuss for placement. Generally, the first column on the right when you walk into the bar is the most ideal location. The juke box sits 64" in height from the floor. The jukebox fits on a wall or column. In very rare circumstances we've even mounted on top of the half wall partition.

Location description _____

- 4) Electrical Requirement

We require a 3 way grounded 120v electrical outlet to be supplied, generally we plug into the nearest TV outlet to the jukebox. If your specific fire code ordinances prohibit the use of a 3-way grounded 15' extension cord, then it is required on your part to provide an outlet within 3 ft of the jukebox.

- 5) TV Sound

If you have the NFL sports package or have paid for the license, we can add the TV sound to the jukebox.

YES _____ NO _____
